LUKOIL TO SUPPLY INDUSTRIAL OILS TO FEDERAL GRID COMPANY OF UNIFIED ENERGY SYSTEM OF RUSSIA

LUKOIL has won a tender of the Federal Grid Company of Unified Energy System (FGC UES) on supplies of lubricants in 2018-2020. The FGC UES' branches will receive over 2000 tons of LUKOIL modern transformer and compressor oils.

These products were developed in accordance to the requirements of International Electrotechnical Commission (IEC 60296 Class IIA) for the transformer oils and global DIN 51506 VDL specifications for compressor oils. The efficiency of these products was confirmed during tests at the equipment of FGC UES. Particularly, LUKOIL STABIO application allowed to increase change interval twofold compared to the previously used lubricants.

Note to editors:

FGC UES is one of the largest global electricity transmission company based on the length of transmission lines and transformer capacity. FGC UES is responsible for more than 143.2 thousand kilometers and 946 electrical sub-station of total capacity of over 347.3 GVA. The company provides reliable power supply in 77 regions of Russia, spanning a total area of 15.1 mln sq. kilometers.
