LUKOIL TO PROVIDE MOGILEVKHIMVOLOKNO WITH LUBRICANTS FOR MODERN GAS ENGINES

LUKOIL has started to supply engine oils for gas engines to Belarus-based Mogilevkhimvolokno, one of the largest chemical companies in Europe.

The company will provide MWM gas gen units of Mogilevkhimvolokno power park with low ash LUKOIL EFFORSE XDI 4004 oil. The product was developed specifically for the modern gas motor-generators. The product has received approvals from the leading fixed gas engine manufacturers GE Jenbacher and MWM upon successful field tests.

Mogilevkhimvolokno produces components for a vast array of plastic products and synthetic fibers for consumer goods industry. The collaboration of LUKOIL and Belarusian partner started in 2016. The chemical company uses in its equipment a wide range of engine, hydraulic, transmission and transformer LUKOIL oils.
