FAO Dr. Andrey Sterkhov
Head of Research & Development
Lukoil Lubricants Company LLK International
6 Malaya Yakimanka Street
Moscow Russia 119180

Dear Dr. Sterkhov,

We have reviewed the fluid properties and the 35VQ25 test results (Eaton ATS 373 and ASTM D 6973) for Lukoil Geyser LT 32.

It is our opinion that Lukoil Geyser LT 32 meets the anti-wear requirements of the hydraulic fluid recommendations for the Eaton Vickers products according to Brochure 03-401-2010.

Since Lukoil Geyser LT 32 contain polymeric viscosity improvers, allowance should be made for both temporary and permanent shear loss of viscosity when setting system maximum oil operating temperature.

Sincerely,

Thelma Marougy
Lubricant Specialist
Eaton Hydraulics Group
